

come and work with us

Site Supervisor/Foreperson

Here within the Anglian Water @one Alliance, we are a collaborative organisation made up of our seven partner companies (Anglian Water, Balfour Beatty, Barhale, MMB, MWH Treatment, Skanska and SWECO) and our extended supply chain, delivering over half of Anglian Water's capital investment programme.

Now working in the latest Asset Management Period, AMP 7, we are working towards delivering an approximate £1.8bn programme of work until 2025. We will then move into the AMP8.

Responsible for delivering the best infrastructure and non-infrastructure solutions for the whole region on circa 800 projects, we champion safety, sustainability, customers, and innovation.

Our site teams are a critical part of our success. To bolster our site leadership capabilities, we are looking for a new Site Supervisor/Foreperson to lead teams to project success!

Leading our teams towards safety, quality, and project targets consistently, you'll be a vital link between our Site Managers and site operatives by ensuring key messages are appropriately conveyed. Always working with transparency and integrity, you'll lead by example and provide your teams with the exposure and opportunity to flourish whilst ensuring we strive towards our outperformance targets.

- Ensure work carried out meets @one alliance and statutory legal requirements via a range of activities including site inspections, reviewing method statements and risk assessments, and delivering toolbox talks.
- Ensure site personnel have relevant training and plant equipment/ machinery are in good working order with in-date certificates.
- Communicate with site team members on upcoming activities ensuring all requirements are met minimising any delays to production.
- Oversee temporary works ensuring work is installed as per the design and the Site Manager is kept updated accordingly.
- Encourage and promote near-miss reporting ensuring close-outs are delivered and fed back to the site manager and operatives.
- Champion a 'Get it right first-time mentality'; Check the quality of finished products delivered by teams ensuring the product is completed to a high standard.
- Schedule, coordinate and supervise the daily activities of gangs/site operatives.
- Order and manage hired internal and external equipment daily to optimise performance and reduce costs.

Work: Cross-country pipelines, temporary works, working with plant, pressure testing, reinstatement, Earthmoving, Groundworks, Clean Water.

Tickets: SSSTS, NVQ level 3, NRSWA, National water hygiene, Deep Excavation
